

Tell us about your commute. It may inspire others to Go By Bike!

I'm putting together a page that will inspire people to consider commuting by bike, or just getting around in general on a bike instead of driving. So many of the trips taken by car are short (under 3 miles) and don't require hauling 50 pound bags of dog food, and yet we don't think twice about grabbing the car keys and driving. Time to "Think Different" as Apple would say! So please, respond to this with your bike commute story, and I'll see what I can do to organize things and inspire others. Thanks- --Mike--
