

Sorry that posts went "missing" for a while

We had a serious issue with posts from 11/13 on not being visible; a weird bug where, if you typed www.ChainReactionBlogs.com/diary you saw everything, but if you did ChainReactionBlogs.com/diary (omitting the "www" at the front), you missed all the recent stuff. I finally found a "stuck" file that was causing the issue. Should be fine now.

Meantime, no bike blogs until next Sunday; I'm heading to Peru with my daughter (Becky, who many of you know from seeing her in our Redwood City store). No riding, lots of hiking around, seeing the sights in the Sacred Valley (including, of course, Machu Picchu). No idea if I'll have much of a 'net connection; if I do, look for things here!
