

10-minute recap of Sunday's wet coastal ride

Took a few times to get the quality reasonable; the default upload quality was horrible, so I rendered it as a high-quality AVI file, about 1.2 gigs, and uploaded that. Now it's watchable! You can even select 1080 HQ resolution.

2 hours 47 minutes edited down to 10 minutes that gives you an idea of what this ride is like ("this ride" being Woodside, Old LaHonda, San Gregorio, Tunitas Creek, Kings Mtn, Woodside). --Mike--
